Cocoa, FL 32926

Dear Really,

The portable chemical injection system has been performing with great accuracy. It has served all our needs: precise application and maximizing vehicle storage space. The Chemilizer pump/motor ensures us that we are not wasting expensive chemical and when checking the flow meter for gallons used, the fixed setting has proved to be right on.

All the various parts on this equipment are truly quality and easily maintained. It is with pride when we show the injector to our clients. Some equipment is over priced – this one is worth every cent.

In addition, we now have the ability to have one service truck that can do both pest control and termite control. Also in a bind, it's great to know that the entire system will fit in the trunk of a car.

We would like to sincerely thank you and your staff for all the initial support and prompt response they have extended to all our questions and needs as we learned how to use this most valuable tool.

Best regards,

Edward Kornfeld / President
